|                             |                         |                               |
|-----------------------------|-------------------------|-------------------------------|
| Object-Oriented Programming | Server-Side Scripting   | SQL/NoSQL Database Management |
| Java Development            | Node.js Development     | C++/C# Development            |
| Python Scripting            | IOS/Android Development | Git Proficiency               |
| PHP Web Development         | Testing and Debugging   | Agile Methodology Familiarity |

## Education

|                                    |  |
|------------------------------------|--|
| 2021 – present<br>Montreal, Canada | <b>Computer Science - Programming (DEC)</b><br>Lasalle College |
|------------------------------------|--|

## Projects

### Northern Lights Hospital [↗](#)

The NLH project modernizes patient tracking with a multi-tier C# app, offering role-based access for administrators, admissions, doctors, and nurses to efficiently manage patient records and hospital operations.

### GA Gaming Accessory Supplier Website [↗](#)

GA is a PHP e-commerce website that allows users to browse categories, search for products, add to their cart, and checkout. It offers admin tools for product and category management using MySQL.

## Courses

|                                      |                                     |                             |
|--------------------------------------|-------------------------------------|-----------------------------|
| Advanced Object-oriented programming | Ultimate Django                     | Multi-tier applications     |
| Data Structures                      | Web server applications development | The Complete Node.js Course |

## Languages

|   |  |   |
|---|--|---|
| <b>English</b><br>Highly proficient at all skills | <b>French</b><br>Limited working proficiency | <b>Farsi (Persian)</b><br>Native / full working proficiency |
|---|--|---|
